RomWBW Distribution File Catalog

This document is a reference to the files found on the disk media distributed with RomWBW. Specifically, RomWBW provides a set of floppy and hard disk images in the Binary directory of the distribution. The contents of these images is listed here.

The files on the disk images were sourced from a variety of locations. The primary sources of these files are listed below. Note that the primary documentation for each of these sources is listed. You are strongly encouraged to refer to this documentation for more information on using the applications and files listed.

This document primarily describes to contents of the hard disk images. Floppy disk images may contain a cut down (sub-set) of the files on a hard disk. This is of course to conserve disk space

Note: This document received a major update in October 2024, when while still not fully complete, most of the core operating system disks should now be fully described.

1.1 Sources

- **RomWBW:** RomWBW Custom Applications

Documentation: *RomWBW Applications.pdf*

These files are custom applications built exclusively to enhance the functionality of RomWBW. In some cases they are built from scratch while others are customized versions of well known CP/M tools.

- **CPM22:** Digital Research CP/M-80 2.2 Distribution Files

Documentation: *CPM Manual.pdf*

These files are from the official Digital Research distribution of CP/M 2.2. Applications have been patched according to the DRI patch list.

- **ZSDOS:** ZSDOS 1.1 Disk Operating System Distribution Files

Documentation: *ZSDOS Manual.pdf*

These files are from the official ZSDOS 1.1 distribution. Some of the files are redistributions of applications from other sources.

- **ZCPR:** ZCPR 1.0 Command Processor Distribution Files

Documentation: *ZCPR Manual.pdf*

These files are from the ZCPR 1.0 distribution.

- **NZCOM:** NZCOM Automatic Z-System Distribution Files

Documentation: *NZCOM Users Manual.pdf*

These files are from the last official release of NZCOM.

- **CPM3:** Digital Research CP/M 3 Distribution Files

Documentation: *CPM3 Users Guide.pdf*, *CPM3 System Guide.pdf*, *CPM3 Programmers Guide.pdf*, *CPM3 Command Summary.pdf*

These files are from the official Digital Research distribution of CP/M 3. Applications have been patched according to the DRI patch list.

- **ZPM3:** Digital Research CP/M-80 2.2 Distribution Files

Documentation: *CPM Manual.pdf*

These files are from Simeon Cran's ZPM3 operating system distribution.

Chapter 2

Operating System Boot Disks

RomWBW contains several ready-to-run disks, that have been adapted for RomWBW. These disks are bootable as is (the operating system image is already embedded in the system tracks) and can be launched from the RomWBW Loader prompt.

Each Disk contains the following file

File	Description
README . TXT	Information about the Operating System

2.1 CP/M 2.2

A vanilla distribution of DRI's CP/M-80 2.2 adapted for RomWBW.

Floppy Disk Image: **fd_cpm22.img**

Hard Disk Image: **hd_cpm22.img**

Combo Disk Image: **Slice 0**

2.1.1 CP/M 2.2 OS Files

These are built and provide the OS. CP/M 2.2 Typically has no boot files stored on the disk. It entirely boots from the system track

The following files appear in User Area 0

File	Source	Description
CPM.SYS	RomWBW	DRI CPM 2.2 Boot Image for SYSCOPY

The

2.1.2 CP/M 2.2 Files

The following CP/M 2.2 files were distributed by DRI with the operating system or as supplemental add-on programs. They are documented in the “CP/M Manual.pdf” document in the Doc/CPM directory of the Rom WBW distribution.

The following files appear in User Area 0

File	Description	Also Found In
ASM.COM	8080 assembler	NZCOM, QPM, ZSDOS
DDT.COM	8080 dunamic debugger	QPM
DUMP.COM	type contents of file in hex	QPM
ED.COM	line editor	QPM
HELP.COM	CP/M 3 Derived HELP display	QPM
HELP.HLP	CP/M 3 Derived HELP data file	QPM
LIB.COM	object file library manager	NZCOM, QPM, ZSDOS
LINK.COM	object file linker	NZCOM, QPM, ZSDOS
LOAD.COM	loader for Intel hex files	NZCOM, QPM, ZSDOS
MAC.COM	8080 macro assembler	NZCOM, QPM, ZSDOS
PIP.COM	file transfer program	QPM
RMAC.COM	8080 macro assembler	NZCOM, QPM, ZSDOS
STAT.COM	file/disk/device info & config	NZCOM, QPM, ZSDOS
SUBMIT.COM	batch file submission tool	NZCOM, QPM, ZSDOS
XSUB.COM	batch file resident extension	NZCOM, QPM, ZSDOS
ZSID.COM	Z80 symbolic debugger	QPM

As noted above several of theses files are also present in other disk images besides CP/M 2.2

MAC, RMAC, ZSID are supplemental programs from DRI with separate standalone documentation which is not included in the RomWBW package (but easily found on the Internet via Google search).

2.1.3 Additional Files

File	Documentation	User Area
	RomWBW Supplemental Applications	0
	General Purpose Applications	0
	Testing Applications	2
	Sample Audio Files	3
	CP/NET 1.2	4
	SIMH Simulator	13

2.2 ZSDOS 1.1

It contains a customized version of ZSDOS 1.1 for RomWBW. The disk is bootable as is (the operating system image is already embedded in the system tracks) and can be launched from the RomWBW Loader prompt.

The starting point for the disk content was the final public release of ZSDOS which is generally available on the Internet.

Floppy Disk Image: **fd_zsdos.img**

Hard Disk Image: **hd_zsdos.img**

Combo Disk Image: **Slice 1**

2.2.1 ZSDOS 1.1 OS Files

These are built and provide the OS. ZSDOS Typically has no boot files stored on the disk. It entirely boots from the system track

The following files appear in User Area 0

File	Source	Description
ZSYS.SYS	RomWBW	ZSDOS Boot Image for SYSCOPY

2.2.2 ZSDOS 1.1 Files

The following files came from the official ZSDOS distribution. These are generally documented in the "ZSDOS Manual.pdf" document in the Doc/CPM directory of the RomWBW distribution.

Note: Some of the files included in the ZSDOS distribution are not listed below because they have been superseded by more recent versions listed in other sections below.

The following files appear in User Area 0

File	Description
BGPATCH.HEX	Patches BackGrounder II for ZSDOS 1.1 compatibility
CLOCKS.DAT	Library of clock drivers
COPY.COM	Enhanced File copier with file dates and archiving
COPY.CFG	Configuration file (ZCNFG) for COPY.COM
COPY.UPD	Document describing updates to COPY program
DATSWEEP.COM	Comprehensive file management w/ date stamp awareness
DSCONFIG.COM	Program to configure DATSWEEP

File	Description
FA16.CFG	ZCNFG configuration file for FILEATTR.COM
FA16.DOC	Documentation for FILEATTR.COM
FA16A.FOR	Summary Information for FILEATTR.COM
FA16CFG.TXT	describes configuration options for FILEATTR.COM
FILEATTR.COM	Set and/or display file attributes
FILEDATE.COM	Date/time stamping aware disk directory utility
FILEDATE.CFG	ZCNFG configuration file for FILEDATE
INITDIR.COM	Prepare disk for P2DOS date/time stamping
INITDIR.CFG	ZCNFG configuration file for INITDIR
LDDS.COM	Load DateStamper date/time stamping resident extension
LDNZT.COM	Load NZT date/time stamping resident extension
LDP2D.COM	Load P2DOS date/time stamping resident extension
PUTBG.COM	Updated replacement for BackGrounder II PUTBG program
PUTDS.COM	Prepare disk for datestamper date/time stamping
RELOG.COM	Clear fixed disk login vector in ZSDOS
SETTERM.COM	Terminal configuration utility for DATSWEEP & DSCONFIG
SETUPZST.COM	Creates date/time stamping resident extensions
STAMPS.DAT	Library of date/time stamping modules for SETUPZST
TD.COM	Read and set system real-time clock
TD.CFG	ZCNFG Configuration file for TD.COM
TERMBASE.DAT	Library of terminals used by SETTERM
TESTCLOCK.COM	Test a selected clock driver
ZCAL.COM	Display a small one-month calendar to the screen
ZCNFG.COM	Configuration tool for programs with .CFG files
ZCNFG24.CFG	Configuration file for ZCNFG.COM
ZPATH.COM	Set or display ZSDOS and ZCPR search paths
ZSCONFIG.COM	Configure features of ZSDOS operating systems
ZSVSTAMP.COM	Preserves file date/time stamp across modifications
ZSVSTAMP.DOC	Document describes the use and operation of ZSVSTAMP

NOTE: These files are also included in the NZ-COM disk image distribution

2.2.3 Additional Files

Documentation	User Area
CP/M 2.2 Files	0

Documentation	User Area
RomWBW Supplemental Applications	0
General Purpose Applications	0
Testing Applications	2
Sample Audio Files	3
Common Z-System Files	10,14,15
SIMH Simulator	13

2.3 NZCOM

This disk contains NZ-COM, which is an implementation of the Z-System. You may also see NZ-COM referred to as ZCPR 3.4. This is a powerful replacement for CP/M 2.2 w/ full backward compatibility. NZ-COM is extremely configurable and far more powerful than DRI CP/M. It is almost mandatory that you read the NZ-COM manual to use the system effectively.

Floppy Disk Image: **fd_nzcom.img**

Hard Disk Image: **hd_nzcom.img**

Combo Disk Image: **Slice 2**

2.3.1 NZ-COM OS Files

NZ-COM is not designed to load directly from the boot tracks of a disk. Instead, it expects to be loaded from an already running OS.

This disk has been configured to boot using ZSDOS with a PROFILE.SUB command file that automatically loads NZ-COM. So, NZ-COM will load completely without any intervention, but you may notice that ZSDOS loads first, then ZSDOS loads NZ-COM.

The following files appear in User Area 0

File	Source	Description
!(C)1988	NZCOM	Original copyright (since placed in public domain)
!NZ-COM	NZCOM	Software marker directory entry (empty file)
!VERS--1.2H	NZCOM	Version marker directory entry (empty file)
NZCOM.COM	NZCOM	NZCOM Loads and launches NZ-COM system
NZCOM.ENV	RomWBW	NZCOM Z-System environment descriptor
NZCOM.LBR	NZCOM	NZCOM Library of NZCOM system modules
NZCOM.ZCM	RomWBW	NZCOM environment descriptor (alternate format)
NZCPR.LBR	NZCOM	NZCOM Library of alternative ZCPR modules
PROFILE.SUB	RomWBW	Command file to auto-start NZ-COM at system boot
RCP.LBR	NZCOM	NZCOM Library of alternative RCP modules
STARTZCM.COM	NZCOM	Commands to execute after NZ-COM is launched
ZRDOS.ZRL	NZCOM	NZCOM Relocatable version of ZRDOS BDOS module
ZSDOS.ZRL	NZCOM	NCCOM Relocatable version of ZSDOS 1.1 BDOS module
ZSYS.SYS	RomWBW	ZSDOS Boot Image for SYSCOPY

2.3.2 NZ-COM Files

The following files came from the official NZ-COM distribution. These are generally documented in the “NZCOM Users Manual.pdf” document in the Doc/CPM directory of the RomWBW distribution. Note that some of the files included in the NZ-COM distribution are not listed below because they have been superseded by more recent versions listed in other sections below.

The following file are in User Area 15, and where noted 14 for config files.

File	Description
ALIAS.COM	Sample alias definitions for use with ARUNZ
ARUNZ.COM	Alias-RUN-for-Z-System command alias execution
CLEDINST.COM	Command line editing and history shell installer
CLEDSAVE.COM	Save RCP-resident command line editor history
CMDRUN.COM	Extended Command Processor (copied from ARUNZ)
CONFIG.LBR	Various configuration files for use with ZCNFG. (U14)
CPSET.COM	Displays/defines CRT/PRT characteristics
EDITNDR.COM	Edit named directory register in memory
FCP.LBR	Library of alternative FCP modules
FF.COM	File finder utility
HELP.COM	(HELPC14) is an improved version of the help utility
IF.COM	Extended flow control tester for FCP
JETLDR.COM	Z-System General-purpose module loader
LBRHELP.COM	Help file viewer for use with help file libraries (.LBR)
LDIR.COM	Directory lister for libraries (.LBR)
LPUT.COM	Puts file(s) into a library (.LBR)
LSH.COM	Command history shell and command line editor
LSH-HELP.COM	Display LSH help when LSH is running
LSHINST.COM	LSH configuration editor
LX.COM	Execute programs directly from a library (.LBR)
MKZCM.COM	Create/update NZ-COM load environment
NAME.COM	Quickly add or remove a name for a single directory
NZBLITZ.COM	Rapid coldboot of complete NZ-COM system image
NZBLTZ14.CFG	ZCNFG configuration file for NZBLITZ. (U14)
PATH.COM	Set/display command search path
PUBLIC.COM	Specify ZRDOS public directories/user areas
PWD.COM	Displays DU and Directory Names with paging
SAINST.COM	Install/configure SALIAS
SALIAS.COM	Screen oriented alias editor

File	Description
SAVENDR.COM	Writes the named directory register to disk
SDZ.COM	Enhanced directory lister
SHOW.COM	Display Z-System configuration information
SUB.COM	Enhanced version of SUBMIT
TY3ERA.COM	Type-3 program to erase a file
TY3REN.COM	Type-3 program to rename a file
TY4ERA.COM	Type-4 program to erase a file
TY4REN.COM	Type-4 program to rename a file
TY4SAVE.COM	Type-4 program to save memory to a file
TY4SP.COM	Type-4 program to display disk space
VIEW.COM	Quad directional file viewer
XTCAP.COM	Interactive Extended TCAP Installer
ZERR.COM	Z34 Error Handler
ZEX.COM	Powerful command line batch processor
ZF-DIM.COM	ZFILER shell for dim-video terminals
ZF-REV.COM	ZFILER shell for reverse-video terminals
ZFILER.COM	Macro script file for ZFILER
ZLT.COM	File lister with support for compressed files

Documentation

The following documentation files are in User Area 10

File	Description
BGZRDS19.LBR	Patch for Backgrounder II
DOCFILES.LBR	Documentation and help files collected into an LBR file
HLPFILES.LBR	Various app help files for use with LBRHELP
LSH.WZ	User manual for LSH
NZ-DBASE.INF	dBase II application note regarding SUBMIT files
NZBLTZ14.HZP	Help file for NZBLITZ
RELEASE.NOT	NZCOM Update information on NZ-COM
TCJ.INF	List of included articles from The Computer Journal
TCJ*.WZ	Selected articles from The Computer Journal
ZFILEB38.LZT	Brief listing of Z-System support programs
ZHELPERS.LZT	List of volunteers who will help installing Z-System
ZNODES66.LZT	List of Z-Node remote access systems
ZSYSTEM.IZF	Information on Z-System and related products

2.3.3 Additional Files

Documentation	User Area
Testing Applications	2
Sample Audio Files	3
CP/NET 1.2	4
Common Z-System Files	10,14,15
ZSDOS 1.1 Files	10,14,15
SIMH Simulator	13
CP/M 2.2 Files	15
RomWBW Supplemental Applications	15,10
General Purpose Applications	15

2.4 CP/M 3

A vanilla distribution of DRI's CP/M 3, also known as CP/M Plus adapted for RomWBW.

Floppy Disk Image: **fd_cpm3.img**

Hard Disk Image: **hd_cpm3.img**

Combo Disk Image: **Slice 3**

2.4.1 CP/M 3 OS Files

The following files appear in User Area 0

File	Source	Description
BDOS3.SPR	CPM3	DRI CPM+ GENCPM input file for the non-banked BDOS
BIOS3.SPR	RomWBW	DRI CPM+ GENCPM input file for non-banked BIOS
BNKBIO3.SPR	RomWBW	DRI CPM+ GENCPM input file for banked BIOS
BNKBDOS3.SPR	CPM3	DRI CPM+ GENCPM input file for banked BDOS
CCP.COM	CPM3	DRI CPM+ Console Command Processor
CPM3.SYS	RomWBW	DRI CPM+ (non-banked) memory image
CPM3RES.SYS	RomWBW	DRI CPM+ (non-banked) memory image
CPM3BNK.SYS	RomWBW	DRI CPM+ (banked) memory image
CPM3FIX.PAT	CPM3	
CPMLDR.COM	RomWBW	DRI CPM 3.0 Boot Loader Application
CPMLDR.SYS	RomWBW	DRI CPM 3.0 Boot Loader for SYSCOPY
GENBNK.DAT	RomWBW	
GENRES.DAT	RomWBW	
GENCPM.DAT	RomWBW	DRI CPM+ System generation tool data file
GENCPM.COM	CPM3	DRI CPM+ Create a memory image of CPM3.SYS
RESBDOS3.SPR	CPM3	DRI CPM+ GENCPM input file for resident BDOS
README.1ST	CPM3	

2.4.2 CP/M 3 Files

The following CP/M 3 files were distributed by DRI with the operating system or as supplemental add-on programs.

The following files appear in User Area 0

**File*	Description
DATE.COM	DRI CPM+ Set or display the date and time
DEVICE.COM	DRI CPM+ Assign logical devices with one or more physical devices
DIR.COM	DRI CPM+ DIR with options
DUMP.COM	DRI type contents of disk file in hex
ED.COM	DRI context editor
ERASE.COM	DRI file deletion
GENCOM.COM	DRI CPM+ Generate special COM file with attached RSX files
GET.COM	DRI CPM+ Temporarily get console input from a disk file
HELP.COM	DRI CPM+ Display information on how to use commands
HELP.HLP	DRI CPM+ Database of help information for HELP.COM
HEXCOM.COM	DRI CPM+ Create a COM file from a hex file output by MAC
INITDIR.COM	DRI CPM+ Initializes a disk to allow time and date stamping
PATCH.COM	DRI CPM+ Display or install patch to the CPM+ system or command files
PIP.COM	DRI Periperal Interchange Program
PUT.COM	DIR CPM+ Temporarily redirect printer or console output to a disk file
RENAME.COM	DRI CPM+ Rename a file
SAVE.COM	DRI CPM+ Copy the contents of memory to a file
SET.COM	DIR CPM+ Set file options
SETDEF.COM	DIR CPM+ Set system options including the drive search chain
SHOW.COM	DIR CPM+ Display disk and drive statistics
SUBMIT.COM	DRI batch processor
TYPE.COM	DIR CPM+ Display the contents of an ASCII character file
ZSID.COM	DRI Z80 symbolic instruction debugger

2.4.3 Additional Files

Documentation	User Area
RomWBW Supplemental Applications	0
General Purpose Applications	0
Testing Applications	2
Sample Audio Files	3
CP/NET 1.2	4
SIMH Simulator	13

2.5 ZPM3

This is a generic ZPM3 adaptation for RomWBW.

Floppy Disk Image: **fd_zpm3.img**

Hard Disk Image: **hd_zpm3.img**

Combo Disk Image: **Slice 4**

Per ZPM3 standard, files are distributed across different user areas depending on their usage. Normal applications are in user area 15. Help files in user area 10. Configuration files in user area 14.

2.5.1 ZPM3 OS Files

The following files appear in User Area 0

File	Source	Description
BNKBIOS3.SPR	RomWBW	Banked BIOS
BNKBDOS3.SPR	ZPM3	Banked BDOS
CPM3.SYS	RomWBW	ZPM3 system file (See Note)
GENCPM.DAT	RomWBW	DRI CPM+ System generation tool data file
HELP.HLP	ZPM3	System Help File
MAKEDOS.COM	ZPM3	Utility to overlay your system file with ZPM3
STARTZPM.COM	RomWBW	Commands to execute after ZPM is launched
RESBDOS3.SPR	ZPM3	Resident BDOS
ZCCP.COM	ZPM3	ZCCP replacement for CCP.COM
ZINSTAL.ZPM	ZPM3	Segment containing environment information
ZPMLDR.COM	RomWBW	ZPM3 Boot Loader Application
ZPMLDR.SYS	RomWBW	ZPM3 Boot Loader for SYSCOPY

NOTE: Currently GENCPM.COM is located in User Area 15

NOTE: The ZPM3 system file is called CPM3.SYS. This is the ZPM3 default configuration. It is done to maximize compatibility with CP/M 3.

Either ZPMLDR or CPMLDR can be used to launch ZPM3. CPMLDR is equivalent to ZPMLDR.

The following files appear in User Area 15

File	Source	Description
AUTOTOG.COM	ZPM3	
CLRHIST.COM	ZPM3	
SETZ3.COM	ZPM3	

2.5.2 ZPM3 Files

This is a generic ZPM3 adaptation for RomWBW.

File	User Area	Description
ALIAS.COM	15	
ALIAS.HLP	10	
ARUNZ.COM	15	Alias-RUN-forZ-System command alias execution
COPY.COM	15	
COPY.CFG	14	
DEV.COM	15	
DISKINFO.COM	15	ZCPR utility which gives information about your disks.
DU.COM	15	
EDITNDR.COM	15	
ERASE.CFG	14	
GENCPM.COM	15	DRI CPM3 Utility to Create a memory image of CPM3.SYS
GOTO.COM	15	
HELPC15.CFG	14	
HP-RPN.HLP	10	Help File for HP RPN Calculators ?
HP-ZP.HLP	10	Help File for HP ZP Calculators ?
IF.COM	15	
IF.HLP	10	
LOADSEG.COM	15	ZCCP Utility to Load RSXes, TCAPs and Named Directory files.
MENU.HLP	10	
NAMES.NDR	15	Default Directory Names loaded at boot
REMOVE.COM	15	
RSXDIR.COM	15	ZCPR Utility which displays RSXes in memory
SAINST.COM	15	
SALIAS.COM	15	Screen oriented alias editor
SAVENDR.COM	15	NZCOM Writes the named directory to disk
SDZ.COM	15	NZCOM Enhanced directory lister
SETPATH.COM	15	used to set the command search path.

File	User Area	Description
VERROR.COM	15	Installs a resident error handler
VLU.COM	15	Video Library Utility views or extracts files from libraries
VLU.HLP	10	
XREF.COM	15	
ZCNFG.COM	15	Configuration tool for programs with .CFG files
ZCNFG24.CFG	14	Configuration file for ZCNFG.COM
ZERASE.COM	15	
ZEX.COM	15	ZCPR A memory-based command file processor, like SUBMIT
ZEX.CFG	14	
ZFHIST.HLP	10	
ZFILER.COM	15	File management shell, with GUI.
ZFILER.HLP	10	Help file for ZFILER.COM
ZF11.CFG	14	
ZFMACRO.HLP	10	
ZHELP.COM	15	
ZP.COM	15	Z-System Patch utility edits files, disk sectors, or memory
ZP.HLP	10	Help File for ZP.COM
ZP17.CFG	14	
ZSHOW.COM	15	displays amount of information about your Z-System

2.5.3 Additional Files

Documentation	User Area
Testing Applications	2
Sample Audio Files	3
Common Z-System Files	10,14,15
SIMH Simulator	13
CP/M 3 Files	15
RomWBW Supplemental Applications	15
General Purpose Applications	15

2.6 QPM 2.7

The following files came from from Microcode Consulting. The official distribution files can be found on the Microcode Consulting website at [<https://www.microcodeconsult->

ing.com/z80/qpm.htm]. Also included in this image are debugz, and linkz frm the same company.

This disk includes the standard DRI CP/M 2.2 files in addition to the QP/M files. QP/M generally assumes you already had DRI CP/M 2.2 prior to adding QP/M features.

2.6.1 QPM 2.7 OS Files

These are built and provide the OS. QPM Typically has no boot files stored on the disk. It entirely boots from the system track

The following files appear in User Area 0

File	Description
QPM.SYS	RomWBW configured QP/M system image (for use with SYSCOPY)

The qpm.sys file and the QP/M image on the system tracks was created using QINSTALL with default settings EXCEPT for the two settings described under Notes (current drive/user storage address and TIMDAT vector).

2.6.2 QPM 2.7 Files

The following files appear in User Area 0

File	Description
D.COM	Directory lister
DBGINST.COM	Configures DEBUGZ debugger
DEBUGZ.COM	Symbolic debugger for Z80
DEBUGZ.HLP	Symbolic debugger help file
DHORIZ.COM	Version of directory lister for horizontal file sorting
HELLO.QPM	Text file with QP/M version information
LZ.COM	Z80 Linking Loader
QBACKUP.COM	Data backup application
QINSTALL.COM	QP/M installer / configurator
QPATCH.COM	Patches (customizes) a few QP/M applications
QPIP.COM	QP/M enhanced version of CP/M 2.2 PIP application
QPMCLK.MAC	Example of QP/M clock assembler routine
QPMCMD.S.TXT	Brief summary of QP/M commands
QPMUTILS.TXT	Brief summary of QP/M utilities

File	Description
QSTAMP.COM	Initializes disk for date/time stamping
QSTAMPV.COM	Initializes disk for date/time stamping (vertical sort)
QSTAMPX.COM	Initializes disk for date/time stamping (horizontal sort)
QSTAT.COM	QP/M enhanced version of CP/M 2.2 STAT application
QSUB.COM	QP/M batch file submission program
QSWEET.COM	QP/M directory sweep utility
QTERM.DAT	Terminal control codes used by DEBUGZ
QTERMS.LIB	Library of available terminal definitions
SETQTERM.COM	Configures QTERM.DAT
TDCNFG.COM	Configures date/time directory display preferences

There are two text files (QPMCMTS.TXT and QPMUTLS.TXT) included. These files have escape sequences imbedded in them which makes them look a little strange depending on the terminal emulation you are using.

Chapter 3

Common Disk Contents

3.1 CP/NET 1.2

User area 4 contains a full implementation of the CP/NET 1.2 client provided by Doug Miller. Please refer to [<https://github.com/durgadas311/cpnet-z80>] for more information, complete documentation and the latest source code.

Please refer to the RomWBW User Guide for instructions on installing and using these packages. Either the MT011 RCBus module or the Duodyne Disk I/O board is required. In general, to use CP/NET on RomWBW, it is intended that you will extract the appropriate set of files into your default directory in user area 0.

The following are found in

- /Binary/CPNET

File | CP/NET Version | OS | Hardware |

```
+-----+-----+-----+-----+ | CPN12MT.LBR | CP/NET 1.2 | CP/M 2.2 | RCBus

```

3.2 Common Z-System Files

The following files are found in

- /Source/Images/Common/Z

- /Source/Images/Common/Z3

Included in All Z Operating Systems (ZSDOS, NZ-COM, ZPM3)

File	Source	Description
LBREX36.CFG	Z	ZCNFG configuration file for LBREXT
LBREXT.COM	Z	Extract file from .LBR libraries
UNARCU1.CFG	Z	
ZXD.CFG	Z	Configuration file for ZXD.COM
ZXD.COM	Z	Extended directory utility w/ date/time stamp support

Included in Z Operating Systems (NZCOM, ZPM3) - Excluding ZSDOS

File	Source	Description
SCOPY.COM	Z3	
SCOPY10F.CFG	Z3	
SCOPY.HLP	Z3	
SCOPY10F.HLP	Z3	
TCAP.Z3T	Z3	
TCSELECT.COM	NZCOM	NZCOM Create terminal capability file
TCVIEW.COM	Z3	
UMAP.COM	Z3	
UMAP18.CFG	Z3	
Z3LOC.COM	NZCOM	Display info of the ZCPR3 CCP, BDOS, and BIOS
Z3TCAP.LBR	NZCOM	NZCOM Database of terminal descriptors

Notes

- Original TCSELECT.COM was removed and replaced with a newer version from the Z3 files
- TCAP.LBR and Z3TCAP.TCP were removed and replaced with Z3TCAP.LBR from new TCSELECT distribution.
- Extract VT100 TCAP from Z3TCAP.LBR and saved it as TCAP.Z3T.
- Z3LOC.COM was removed because more recent versions are provided from Common files.

3.3 General Purpose Applications

The following files are commonly used CP/M applications that are generally useful in any CP/M-like system. In general, there is no documentation for these applications included with the RomWBW distribution. Some provide command line help themselves. Some are fairly obvious.

The following files are found in

- /Source/Images/Common/All
- /Source/Images/Common/CPM22 (for CP/M 2.2 based operating system)
- /Source/Images/Common/CPM3 (for CP/M 3 based operating system)
- /Source/Images/Common/UTILS

File	Source	Description
CLRDIR.COM	All	Initializes the directory area of a disk (from Max Scane)
COMPARE.COM	All	Compare content of two files (binary)
CRUNCH.COM	All	Compress file(s) using Crunch algorithm
CRUNCH28.CFG	All	ZCNFG configuration file for CRUNCH & UNCR
DDTZ.COM	All	Z80 debug tool (modified to use RST 6)
DDTZ.DOC	All	Documentation for DDTZ
EX.COM	All	Batch file processor (alternative to DRI SUBMIT)
FDISK80.COM	All	Hard disk partitioning tool (from John Coffman)
FIND.COM	All	Search all drives for a file (from Jay Cotton)
FLASH.COM	All	Program FLASH chips in-situ (from Will Sowerbutts)
FLASH.DOC	All	Documentation for FLASH
GENHEX.COM	UTILS	Generates an Intel Hex file from the input file
KERCPM22.COM	CP/M 2.2	Kermit communication application
KERCPM3.COM	CP/M 3	Kermit communication application
LS.COM	UTILS	An alternative file listing to DIR
LSWEEP.COM	UTILS	Can extract and view member files of an .LBR archive
MBASIC.COM	All	Microsoft BASIC language interpreter
NULU.COM	All	NZCOM new library utility (.LBR) management tool
PMARC.COM	All	Create or add file(s) to LHA .PMA archive
PMEXT.COM	All	Extract file(s) from .PMA/.LZH/.LHA archive
RZ.COM	CP/M 3	
RZSC.FOR	CP/M 3	
RMXSUB1.COM	All	Remove XSUB1 RSX from memory (from Lars Nelson)
SZ.COM	CP/M 3	
SUPERSUB.COM	All	Enhanced replacement for DRI SUBMIT

File	Source	Description
SUPERSUB.DOC	All	Documentation for SUPERSUB
TDLBASIC.COM	All	TDL Zapple 12K BASIC language interpreter
UNARC.COM	All	Extract file(s) from .ARC or .ARK archive
UNARC.DOC	All	Documentation for UNARC
UNCR.COM	All	Decompress Crunched file(s). See CRUNCH.COM
UNZIP.COM	All	UNZIP extracts from all MS-DOS ZIP files (from Lars Nelson)
UNZIP.DOC	All	Documentation for UNZIP
WDATE.COM	All	Utility to configure RTC Date. (from Kevin Boone)
XSUB1.COM	All	Replacement for DRI SUB (from Lars Nelson)
ZAP.COM	All	Interactive disk & file utility
ZDE.COM	All	Compact WordStar-like editor
ZDE.DOC	All	ZDE Documentation
ZDENST.COM	All	Installation/configuration tool for ZDE
ZMRX.COM	All	
ZMTX.COM	All	

CLRDIR.COM, FDISK80.COM, FLASH.COM, WDATE.COM are documented in the “RomWBW Applications.pdf” document in the Doc directory of the RomWBW Distribution.

3.4 RomWBW Supplemental Applications

The following files provide specific functionality enabled by RomWBW enhancements. These applications are typically documented in the “RomWBW Applications.pdf” document in the Doc directory of the RomWBW Distribution.

The following files are found in

- /Source/Apps
- /Source/Apps/*
- /Source/TastyBasic

File	Source	Description
ASSIGN.COM	RomWBW	Assign,remove,swap drive letters of RomWBW disk slices
COPYSL.COM	M.Pruden	Copy CPM Hard Disk Slices
COPYSL.DOC	M.Pruden	Documentation for COPYSL.COM
CPUSPD.COM	RomWBW	CPU Speed
FAT.COM	RomWBW	MS-DOS FAT filesystem tool (list, copy, delete, format, etc.)

File	Source	Description
FDU.COM	RomWBW	Floppy Disk Utility, Test and format floppy disks
FDU.DOC	RomWBW	Documentation for FDU
FORMAT.COM	RomWBW	Placeholder application with formatting instructions
HTALK.COM	Tom Plano	Terminal utility talking directly to HBIOS Character Units
MODE.COM	RomWBW	Change serial line characteristics (baud rate, etc.)
REBOOT.COM	MartinR	Cold or Warm Boot the RomWBW System
RTC.COM	Andrew Lynch	Test real time clock hardware on your system
SURVEY.COM	RomWBW	Display system resources summary
SYS COPY.COM	RomWBW	Copy system tracks to disks (make bootable)
SYS GEN.COM	DRI	Copy system tracks to disks
TALK.COM	RomWBW	Route console I/O to & from specified serial port
TIMER.COM	RomWBW	Test and display system timer ticks
TUNE.COM	RomWBW	Play .PT2, .PT3, and .MYM audio files on supported hardware
VGMPLAY.COM		Simple player for VGM (Video Game Music) files.
XM.COM	RomWBW	XModem file transfer application
ZMD.COM	R.W.K	Z80 RCP/M File Transfer Program (Robert W. Kramer III)
ZMP.COM		ZModem communications program (requires dedicated comm port)
ZMP.DOC		Documentation for ZMP
ZMP.HLP		Help file for ZMP
ZMXFER.OVR		Overlay file for ZMP
ZMTERM.OVR		Overlay file for ZMP
ZMINIT.OVR		Overlay file for ZMP
ZMCONFIG.OVR		Overlay file for ZMP

The following files are more general purpose applications built specifically by RomWBW

File	Source	Description
BBCBASIC.COM	R.T.Russell	BBC BASIC CP/M Version
BBCBASIC.TXT	R.T.Russell	Help file for BBC BASIC
TBASIC.COM	Dimitri Theulings	Tasty Basic

3.5 Sample Audio Files

User area 3 contains sample audio files that can be played using the TUNE or VGMPLAY applications.

NOTE These files are NOT present on floppy disk images

The following files are found in

- /Binary/Apps/Tunes

File	Description
ATTACK.PT3	Sound File
BACKUP.PT3	Sound File
BADMICE.PT3	Sound File
DEMO.MYM	Sound File
DEMO1.MYM	Sound File
DEMO3.MYM	Sound File
DEMO3MIX.MYM	Sound File
DEMO4.MYM	Sound File
ENDING.VGM	Sound File
HOWRU.PT3	Sound File
INCHINA.VGM	Sound File
ITERATN.PT3	Sound File
LOOKBACK.PT3	Sound File
LOUBOUTN.PT3	Sound File
NAMIDA.PT3	Sound File
RECOLL.PT3	Sound File
SANXION.PT3	Sound File
SHIRAKAW.VGM	Sound File
STARTDEM.VGM	Sound File
SYNCH.PT3	Sound File
TOSTAR.PT3	Sound File
VICTORY.PT3	Sound File
WICKED.PT3	Sound File
WONDER01.VGM	Sound File
YEOLDE.PT3	Sound File
YEOVIL.PT3	Sound File

3.6 SIMH Simulator

Files for use with the SIMH Simulator

The following files are found in

- /Source/Images/Common/SIMH

File	Description
-	-

3.7 Testing Applications

User area 2 contains a variety of hardware testing applications. These are generally user contributed and have no documentation.

These applications are frequently not compatible with all RomWBW hardware. They are included here as a convenience. If applicable, your hardware documentation should refer to them and provide usage instructions.

NOTE These files are NOT present on floppy disk images

The following files are found in

- /Binary/Apps/Test
- /Source/Images/Common/Test

File	Description
2PIOTST.COM	ECB-ZILOG PERIPHERALS BOARD TEST 2 PIO's
AY-TEST.COM	AY-3-8910 Sound Test Program (SOUND)
BANKTEST.COM	Test RomWBW bank management API
DMAMON.COM	Verify operation of the Z80 MBC DMA board
I2CLCD.COM	PCF8584 HD44780 I2C LCD UTILITY
I2CSCAN.COM	I2C BUS SCANNER
INTTEST.COM	Test HBIOS interrupt API functions
KBDTEST.COM	test program to work with the Z80 KBDMSE board
PIOMON.COM	Zilog PIO Monitor & Hardware Testing Application
PORTSCAN.COM	Reads all ports and displays values read
PPIDETST.COM	PPI IDE test for checkout of all 8255 IDE drives
PS2INFO.COM	PS/2 Keyboard/Mouse Information Utility
RAMTEST.COM	RAM_TEST_PROGRAM

File	Description
RTCDS7.COM	PCF8584/DS1307 I2C DATE AND TIME UTILITY (I2C)
RZ.COM	Receive Zmodem disassembly of CP/M 3 binaries
SOUND.COM	RomWBW HBIOS Sound Device Test Tool (SOUND)
SR0M.COM	I2C Serial ROM Read/Write Utility (I2C)
SZ.COM	Send Zmodem is a disassembly of CP/M 3 binaries
TESTH8P.COM	H8 Panel Test
TSTDSKNG.COM	DSKY NEXT GENERATION TEST APPLICATION
VDCONLY.COM	COLOR VDU TEST
VDCTEST.COM	COLOR VDU TEST
ZEXALL.COM	Z80 Instruction Set Exerciser
ZEXDOC.COM	Z80 Instruction Set Exerciser

And The following CPU Tests - Which are probably originally from this source.
[\[https://github.com/raxoft/z80test\]](https://github.com/raxoft/z80test)

File	Description
Z80CCF.COM	tests flags after executing CCF after each instruction.
Z80DOC.COM	tests registers, but only officially documented flags
Z80DOCF.COM	
Z80FLAGS.COM	tests flags, ignores registers.
Z80FULL.COM	tests flags and registers
Z80MPTR.COM	tests flags after executing BIT N,(HL) after each instruction

Chapter 4

Application Standalone Disks

4.1 Aztec C Compiler

Floppy Disk Image: **fd_aztecc.img**

Hard Disk Image: **hd_aztecc.img**

Aztec C is a discontinued programming language for a variety of platforms including MS-DOS, Apple II DOS 3.3 and PReDOS, Commodore 64, Macintosh and Amiga. This disk contains the CP/M version of that compiler. A cross-compiler for MS-DOS or Windows XP is also available.

For full documentation, see [<https://www.aztec-museum.ca>] The user manual is available in the Doc/Language directory Aztec_C_1.06_User_Manual_Mar84.pdf

The following files are found in

- /Source/Images/d_aztec

File	Description
-	-

NOTE : The above is incomplete

4.2 Microsoft Basic Compiler

Floppy Disk Image: **fd_bascomp.img**

Hard Disk Image: **hd_bascomp.img**

The Microsoft BASIC Compiler is a highly efficient programming tool that converts BASIC programs from BASIC source code into machine code. This provides much faster BASIC program execution than has previously been possible. It can make programs run an average of 3 to 10 times faster than programs run under BASIC-80. Compiled programs can be up to 30 times faster than interpreted programs if maximum use of integer variables is made.

View BASCOM.HLP included in the disk image using HELP.COM for documentation.

The following files are found in

- /Source/Images/d_bascomp

File	Description
-	-

NOTE : The above is incomplete

4.3 Cowgol Compiler

Floppy Disk Image: **fd_cowgol.img**

Hard Disk Image: **hd_cowgol.img**

The Cowgol 2.0 compiler and related tools. These files were provided by Ladislau Szilagyi and were sourced from his GitHub repository at [https://github.com/Laci1953/Cowgol_on_CP_M].

The primary distribution site for Cowgol 2.0 is at [<https://github.com/davidgiven/cowgol>]. The user manual is available in the Doc/Language directory Cowgol Language.pdf

The following files are found in

- /Source/Images/d_cowgol

File	Description
ADVENT.COW	Adventure game program source
ADVENT.SUB	Submit file to build ADVENT
ADVENT?.TXT	Adventure game program resource
ADVMAIN.COW	Adventure game program source
RAND.AS	Assembler Library File
COWBE.COM	
COWFE.COM	RomWBW specific (Memory Manage) version
COWLINK.COM	

File	Description
DYNMSORT.COW	demonstrates a sort algorithm
DYNMSORT.SUB	Submit file to build DYNMSORT
HEXDUMP.COW	a simple hex dump utility, purely a Cowgol
HEXDUMP.SUB	Submit file to build HEXDUMP
HMERGES.C	C Library File
XRND.AS	Assembler Library File
-	-

NOTE : The above is incomplete

4.4 Microsoft Fortran 80 (Fortran)

Floppy Disk Image: **fd_fortran.img**

Hard Disk Image: **hd_fortran.img**

This is Microsoft's implementation of the FORTRAN scientific-oriented high level programming language. It was one of their early core languages developed for the 8-bit computers and later brought to the 8086 and IBM PC. In 1993 Microsoft rebranded the product as Microsoft Fortran Powerstation. (Note: -80 refers to the 8080/Z80 platform, not the language specification version)

The user manual is available in the Doc/Language directory, Microsoft_FORTRAN-80_Users_Manual_1977.pdf

The following files are found in

- /Source/Images/d_fortram

File	Description
-	-

NOTE : The above is incomplete

4.5 Games

Floppy Disk Image: **fd_games.img**

Hard Disk Image: **hd_games.img**

This disk contains several games for CP/M including the Infocom games Zork 1 through 3, Planetfall and Hitchhiker's Guide to the Galaxy.

Nemesis and Dungeon Master is a Rogue-like game released in 1981. It is playable on a text terminal using ASCII graphics to represent the dungeon. Only a few thousand copies of the game were ever made, making it very rare. See [<http://crpgaddict.blogspot.com/2019/03/game-322-nemesis-1981.html>]

Colossal Cave Adventure is a CP/M port of the 1976 classic game originally written by Will Crowther for the PDP-10 mainframe. See [https://en.wikipedia.org/wiki/Colossal_Cave_Adventure] and [<https://if50.substack.com/p/1976-adventure>]

The following files are found in

- /Source/Images/d_games

File	Description
-	-

NOTE : The above is incomplete

4.6 HI-TECH C Compiler

Floppy Disk Image: **fd_hitechc.img**

Hard Disk Image: **hd_hitechc.img**

The HI-TECH C Compiler is a set of software which translates programs written in the C language to executable machine code programs. Versions are available which compile programs for operation under the host operating system, or which produce programs for execution in embedded systems without an operating system.

This is the Mar 21, 2023 update 17 released by Tony Nicholson who currently maintains HI-TECH C at [<https://github.com/agn453/HI-TECH-Z80-C>]

The manual is available in the Doc/Language directory, HI-TECH Z80 C Compiler Manual.txt

A good blog post about the HI-TECH C Compiler is available at [<https://techtinkering.com/2008/10/22/installing-the-hi-tech-z80-c-compiler-for-cpm>]

The following files are found in

- /Source/Images/d_hitechc

File	Description

NOTE : The above is incomplete

4.7 MSX ROMS

Hard Disk Image: **hd_msxroms1.img**

Hard Disk Image: **hd_msxroms2.img**

The collection of MSX ROMs (2 disks) as provided by Les Bird.

These ROMs are “run” by using the appropriate variant of Les’ MSX8 ROM loader. You can download the loader binaries from [<https://github.com/lesbird/MSX8>]. You will need appropriate hardware to run the loader.

Please review the file ROMLIST.TXT for information on the current operational status of the ROM and it’s long file name/description.

This disk (RomWBW slice) is not automatically included with the RomWBW “combo” disk images. You can simply add it to a combo image by appending it to the end. After booting your system, you can use the ASSIGN command to map the slice to a drive letter. Refer to the RomWBW User Guide for more information on this process.

The ROM files are found in

- /Source/Images/d_msxroms1
- /Source/Images/d_msxroms2

4.8 Turbo Pascal Compiler

Floppy Disk Image: **fd_tpascal.img**

Hard Disk Image: **hd_tpascal.img**

The Borland Turbo Pascal Compiler. Pascal is a general-purpose, high level programming language originally designed by Professor Niklaus Wirth of the Technical University of Zurich, Switzerland and named in honor of Blaise Pascal, the famous French philosopher and mathematician.

Turbo Pascal closely follows the definition of Standard Pascal as defined in the Pascal User Manual and Report with a few minor differences.

The manual can be found in the Docs/Language directory, Turbo_Pascal_Version_3.0_Reference_Manual_1986.pdf

A good overview of using Turbo Pascal in CP/M is available at [<https://techtinker-ing.com/2013/03/05/turbo-pascal-a-great-choice-for-programming-under-cpm>]

The following files are found in

- /Source/Images/d_tascal

File	Description
ART.TXT	Part of the Example program
SA.PAS	Example Program

4.10 Z80ASM Macro Assembler

Floppy Disk Image: **fd_z80asm.img**

Hard Disk Image: **hd_z80asm.img**

Z80ASM is a relocating macro assembler for CP/M. It takes assembly language source statements from a disk file, converts them into their binary equivalent, and stores the output in either a core-image, Intel hex format, or relocatable object file. The mnemonics recognized are those of Zilog/Mostek. The optional listing output may be sent to a disk file, the console and/or the printer, in any combination. Output files may also be generated containing cross-reference information on each symbol used.

The manual is available in the Doc/Language directory, z80asm (SLR Systems).pdf

A run through of using the assembler is available at [<https://8bitlabs.ca/Posts/2023/05/20/learning-z80-asm>]

The following files are found in

- /Source/Images/d_z80asm

File	Description
DUMP.*	Sample Program
TEST.*	Sample Program
Z80ASM.COM	Relocating macro assembler for CP/M
Z80ASM.DOC	Documentation for Z80.COM

Chapter 5

ERATTA

5.1 File Locations in Build

ZCNFG.COM and the associed CFG file that goes with it. There are alot of these in the source repository, it is good candidate to move to a Common/Z3 folder since it appears to be the same version across most distributions
